Nguyen Ngo

Software Engineer | Development Lead | AWS Solution Architecture
Ho Chi Minh City, Vietnam

Summary

Hello, I'm Nguyen, a passionate software engineer hailing from Vietnam, fueled by over 9 years of enriching journey in full-stack development. My expertise spans across PHP, Python, Javascript, AWS services, Flutter, Ionic, and API integration. Throughout my career, I've orchestrated projects and guided teams of up to 30 brilliant minds, forging powerful collaborations with esteemed international clients.

Driven by a relentless pursuit of excellence, I am on a quest for a challenging opportunity where I can further hone my skills and make meaningful contributions to product development. Let's embark on this journey together, where innovation meets dedication, and trust paves the way for remarkable achievements.

Experience

Tử Nhà Lam
Shopify Developer
January 2020 - Present (5 years 3 months)
Tân Phú, Ho Chi Minh City, Vietnam

SellerMobile
Technical Lead
January 2018 - Present (7 years 3 months)
United States

I joined the company at its inception as the first team member. Within months, we formed a seven-member team and built the SellerMobile project from scratch, transforming it into an enterprise-grade solution on AWS. As a key contributor, I handled diverse responsibilities, including consulting, analysis, team task creation, and problem-solving for development and coding challenges. My role also involved code review, software testing, product launches, and addressing urgent issues promptly.

Key contributions:

- Designed and implemented full-stack software solutions for web and mobile applications.
- Created user-friendly, responsive interfaces and wrote efficient, reusable code in JavaScript, TypeScript, Python, PHP, and more.
- Collaborated with cross-functional teams to meet project goals and deliver high-quality results.
- Integrated frontend components with backend services and APIs for seamless functionality.
- Optimized application performance, conducted debugging, and ensured security best practices.
- Built and maintained databases, designed schemas, and performed database optimization.
- Deployed applications to cloud platforms (AWS, DigitalOcean) and on-premises servers.
- Contributed to project planning, timeline estimation, and provided technical insights for efficiency.
- Conducted code reviews, offered feedback, and maintained coding standards.
- Stayed updated with industry trends to enhance skills and processes.
- Troubleshoot and resolved issues reported by end-users or during testing.

This comprehensive role allowed me to contribute significantly to the project's success while refining my technical and leadership skills.

Freelance

Senior Software Engineer

August 2017 - Present (7 years 8 months)

Javac Technology

Chief Technology Officer

January 2018 - June 2023 (5 years 6 months)

19A Cong Hoa Street, Ward 12, Tan Binh District, Ho Chi Minh City

I have joined this company at the beginning, I'm the first guy, after a few months, we built a small team with 7 members. We helped to build SellerMobile project from scratch to enterprise version on full AWS cloud. I do anything my boss needs, meeting, consultant, analysis and create tasks for members; help to resolve their problems in both solution and coding. I also have responsibilities to review code, soft test, launching and fix urgent issue. Before we hire HR, I also take on finding candidates, contact, interview and decide hiring. As soon as my boss established Javac Technology officially,

I'm promoted to CTO of the company, now I share vision of company growing, Javac runs like a dev shop, we find new clients who need developers to work on their projects, more and more, we have more clients, it means I have more teams to manage.

- * Increased head count from 1 to 30 members
- * Reduced project delivery time through proper process enhancements
- * Performed cross benefit analysis and identified key areas for the company to grow
- * Participated in HR related matters such as recruitment, pay scales, appraisals and employee morale
- * Coached project managers to properly plan project timelines and budgeting
- * Implement best practices and guideline to continually improve performance, scalability and security and to minimize current and future technical debt.
- * Spend 80% of my time on hands on development activities with the engineering team
- * Advise team on code quality, technical decisions, and accompany them during the realization of concepts, both functional and technical.
- * Prototype and research new technologies

CoolGlow.com
