Software Engineer

10e arrondissement de Hồ Chí Minh-Ville, Hồ Chí Minh-Ville, Việt Nam

Résumé

I'm a passionate software developer aspiring to become a Full Stack Software Engineer. My university studies in VR/AR and Holoportation gave me a solid technical foundation in immersive digital environments. I have extensive experience with frontend libraries like ReactJS, VueJS, and AngularJS, and I'm committed to delivering intuitive, user-centred designs. I'm eager to leverage my skills to make a meaningful impact.

Expérience

NAB Innovation Centre Vietnam

Software Engineer

janvier 2025 - Present (3 mois)

Hồ Chí Minh City, Vietnam

- Java, Spring, Javascript, React
- I worked to implement a CIB system for support banker at NAB.
- Handle the miniapp, Backend For Front End and microservice systems.

Zalopay

2 ans 8 mois

Senior Software Engineer

juin 2024 - janvier 2025 (8 mois)

Hồ Chí Minh City, Vietnam

Software Engineer

juin 2022 - juin 2024 (2 ans 1 mois)

Hồ Chí Minh City, Vietnam

- Languages: ReactJS, React Native.
- I worked to implement a Risk system for Face Authentication in the Zalopay Application to KYC and developed the Risk Platform to help the business team check a requirement of the product team to enforce rules, tiers, and profiles.

- Handle the project to configure with the Data Scientist and merchant other teams to verify Risk, implement all UI/UX and FE of the Risk Platform and handle Face Authentication in the Zalopay App on Browser.

Project:

- Risk Base Authentication: Handle all Authentication of Zalopay Product
- Risk Portal: Internal Tool handles All Risk Platforms (support for Data and Production team to set Rules).
- Zalopay Security Center: Handle and track all Transaction failed or need to authentication verify
- Risk DFP SDK: SDK which applies to Mobile to get Device Fingerprints in device apply for Miniapp run on Zalopay.

Katalon

Fullstack Software Developer

décembre 2021 - juillet 2022 (8 mois)

Ho Chi Minh City, Vietnam

- ReactJS, Javascript, Java, Spring Boot.
- I worked in the TestOps Team, which implemented the Katalon Platform in Web Browser. My work is focused on creating UI for the Machine Learning Testing System and Refactor Project to create the Katalon Platform. Before that, we implemented the Test Management UI, which will display all of the test cases, set up the time to run tests, and support the other team in the PC app can show the result to the users automatically.
- Create UI for the Machine Learning Testing System and Refactor Project to create the Katalon Platform

VNUHCM - University of Science

VR/AR Research

août 2019 - juin 2022 (2 ans 11 mois)

Ho Chi Minh City, Vietnam

- C#, Unity
- Research and Development Project combination Mix Reality and Machine Learning.
- Support the teacher in Game Class.

LINE Technology Vietnam

Software Engineer

mars 2021 - octobre 2021 (8 mois)

Ho Chi Minh City, Vietnam

- Javascript, Bootstrap, VueJS

- As an Intern Frontend Developer, I must learn, read and write down my knowledge of VueJS documents, Typescripts, and VannilaJS.
- Built an internal tool that helps HR record employees' leaves (Annual Leave, birthday leave, WFH leave,...) using VueJS, Typescripts, and Bootstrap.

Formation

VNUHCM - University of Science

Bachelor's degree, Information Technology · (2017 - 2021)
