Nguyen Tran Duy Phuong

Software Engineer (PHP) | Technical Writer
Ho Chi Minh City, Vietnam

Summary

A software engineer who loves writing: code, documentation, articles, blog posts, and more.

Good at writing well-documented, self-explanatory code that adheres to language standards. In love with PhpStorm, PHPDocs, KeepAChangeLog, SemVer, Rector, Laravel Pint, Prettier, Docusaurus, and other documentation tools.

Experience

GeoComply
Software Engineer
July 2024 - Present (9 months)
Ho Chi Minh City, Vietnam

Accenture
Senior Software Engineer
June 2022 - June 2024 (2 years 1 month)
Ho Chi Minh City, Vietnam

- Designed, developed and tested custom software solutions across multiple system components or applications, which involved PHP 8, MariaDB, KeyDB, RabbitMQ, and other in-house toolkits.
- Created implementation or integration approaches for applications and components.
- Translated system requirements into design specifications.
- Provided support for installations of application releases into production using GitLab (in a closed, complete, multi-stage CI/CD process which consisted of AWS-based GitLab runners, OpenShift 3, OpenSearch, AWS's Elastic Container Services, and more).

- Designed and wrote clean, reusable, well-documented code for applications inline with programming standards and interface specifications.
- Refactored legacy codebases to modern standards and compliances.

VIETNAM SUZUKI CORPORATION

Web Engineering Specialist

August 2020 - June 2022 (1 year 11 months)

Ho Chi Minh City, Vietnam

- Managed, maintained, built and developed corporate websites (including dedicated automobile/motorcycle microsites for launching campaigns), web-based applications for day-to-day and evolving business needs.
- Established cross-departmental collaboration to conceptualize, design, and implement web solutions to address business requirements. Subsequently provided technical support to users.
- Actively engaged with stakeholders to elicit comprehensive specifications and requirements, ensuring project alignment with their goals and corporate expectations.
- Established partnerships with external parties and agencies to integrate diverse tools/platforms, optimizing functionality and delivering smooth user experience.
- Worked on internal audits and maintenance practices to ensure the integrity and optimal performance of all web systems, providing seamless connectivity and reliable operation.

Suzu Group

Web Project Manager

April 2019 - July 2020 (1 year 4 months)

Ho Chi Minh City, Vietnam

- Managed a technical team of 6 developers.
- Conducted market research, provided business insights and analysis for strategic decision-making.
- Developed prototypes and wireframes for application functionalities.
- Oversaw development plans, provided technical instructions and trained junior developers.
- Improved product quality using knowledge of industry trends.

- Optimized UI/UX for web and mobile applications.
- Contributed as a full-stack developer during urgent periods.

CMN Vietnam Online J.S.C.

Web Development Manager

June 2015 - February 2019 (3 years 9 months)

Ho Chi Minh City, Vietnam

- Created and executed development plans, adapting to evolving needs and requirements.
- Provided technical direction for development, design, and system integration.
- Leveraged industry knowledge to enhance product quality and stay competitive.
- Identified and resolved system deficiencies, implementing effective solutions.
- Established and enforced coding standards, fostering a high-quality codebase.
- Mentored junior developers through code reviews and knowledge sharing.
- Researched and developed new UI, UX, and functionalities to improve user experience.
- Managed technical resources efficiently within budget and project timelines.
- Actively participated in the development process to ensure project success.

Projects:

- kul.vn: An online magazine for the youth which served 100K+ visits daily
- haynhucnhoi.vn: An online portal for sharing viral news and media
