Nguyen Hung (Rio)

Software Developer @ FPT Software | Agile Software Development
Da Nang City, Vietnam

Summary

Hi, I'm Nhat Hung (Rio) and a student at FPT University. Through my professional role, I've developed comprehensive experience in building complete software solutions, working with both front-end and back-end technologies.

At FPT Software, I've gained practical knowledge in the full software development lifecycle, from project planning to deployment. While my foundation started in front-end development, I've actively expanded my skills to include back-end development, giving me a well-rounded perspective in building robust applications.

My greatest strength lies in my unwavering commitment to learning and personal growth. I consistently embrace new challenges as opportunities to expand my knowledge and skills. This resilient mindset, combined with my passion for continuous improvement, drives me to stay current with industry trends and deliver high-quality solutions.

Experience

FPT Software

Software Developer

September 2024 - Present (7 months)

Vietnam

In my role as a Software Developer at FPT Software in Vietnam, I am responsible for designing, developing, and maintaining high-quality software applications. Working closely with cross-functional teams, I analyze requirements and identify optimal solutions to technical challenges. With a solid understanding of programming languages such as Java, C# and JavaScript, I continuously stay updated with new technologies and apply modern software development practices to ensure that the final product not only meets user needs but also exceeds their expectations.
