Startup

DevOps Engineer

June 2018 - October 2019 (1 year 5 months)

Vietnam

- Building a crypto exchange: my responsibility is to design and manage the system.

- Technology:

- + Docker, Kubernetes.

- + Cloud (Google Cloud Platform)

StartUP

Researcher

June 2017 - June 2018 (1 year 1 month)

- Research organization about Computer Vision, Machine Learning and AI.

- Focus on these topics:

- + Marketing Automation: gathering data from many channels and push the marketing scenario to end users automatically. Mining this data to support for making decision.

- + Face recognition: intends to deploy in retail stores

+ Implement ML on a small device like Nvidia Jetson TX2 for packaging and distribution ML solutions.

Peacesoft

Researcher

April 2016 - June 2017 (1 year 3 months)

Ha Noi

- Research on Computer Vision, Machine Learning and AI
- Manage R&D team
- Implement and development some go-live products:
 - + Recommender system for <https://chodientu.vn>
 - + KYC solution: Verime
- Some unfinished projects:
 - + OCR: extract info from identity document.
 - + Chatbot: try to build a chatbot with a long context, not only a QA bot.

Techmaster

Lecturer

August 2015 - 2016 (1 year)

Ha Noi

- Create a Python course.
- Interactive with students: evaluate, remark, give points for students.

Education

Dai hoc Huê

Master's degree, Algebra and Number Theory · (2012 - 2014)
