Kubernetes

Tien Nguyen

DevOps Engineer at FireGroup
Ho Chi Minh City, Vietnam

Summary

I am a graduate in Security with over 3 years of experience as a Full-stack Developer, and nearly 4 years of experience as a DevOps Engineer. As a former Full-stack Developer, I have a deep understanding of the software development process, from development to release. This has equipped me with the ability to comprehend and appreciate developers' perspectives, their requirements, and the challenges they face. Additionally, I have honed my debugging skills and can set up customized CI/CD pipelines to cater to each project's specific needs.

Furthermore, my experience in Information Security and as a DevOps Engineer has provided me with a strong technical skill set and knowledge of security protocols. I have developed expertise in infrastructure automation and the use of tools such as Docker, Kubernetes, and AWS.

Overall, with nearly 5 years of experience in software development, I am a proactive learner, passionate about expanding my skill set and keeping up with new technologies and methodologies. I am always on the lookout for new challenges and opportunities to grow, and I am confident that my skills and experience make me an asset to any team.
