Hung Nguyen Ho

UI/UX Designer

Thủ Đức, Ho Chi Minh City, Vietnam

Summary

Hello, my name is Hung, a UI/UX Designer with over two years of experience in designing user interfaces for mobile applications and websites. With an academic background in information technology and a passion for self-learning UI design, I have developed a range of essential professional skills and have been working as a freelance UI Designer since late 2021.

Having a solid foundation in information technology has provided me with basic knowledge of programming and software development, enabling me to communicate and collaborate effectively with developers.

During my time as a freelance UI Designer, I have accumulated valuable experience, including:

:

Developing detailed wireframes and prototypes to illustrate the structure and functionality of user interfaces.

:

Conducting user research to understand their needs and behaviors, thus improving the design accordingly.

- :

Working closely with developers, UX designers, and marketing specialists to ensure the final product meets the clients' requirements and expectations.

:

Collecting and analyzing user feedback to enhance the design, ensuring that the interface is not only visually appealing but also functional and user-friendly.

:

Proficient in Figma: I am proficient in using Figma for all stages of design, from creating wireframes to building prototypes and final detailed designs.

Using Illustrator and Framer: Besides Figma, I can also use Adobe Illustrator for graphic design and Framer to create more complex interactive prototypes.

With a combination of a strong foundation in information technology and UI design skills honed through self-study, I believe I can contribute positively to user interface design projects, providing the best experience for end-users. I am always ready to face new challenges and seek opportunities to further develop in the field of UI/UX Design.

Experience

LabanHub

UI/UX Design - Frontend Developer

November 2024 - Present (5 months)

Freelance

UI/UX Designer

October 2021 - Present (3 years 6 months)

The role of a Freelance UI Designer involves designing user interfaces for digital products such as websites, mobile applications, and computer software. In this role, I work independently or on contract with startups or individual clients to create user interfaces that are intuitive, user-friendly, and aesthetically pleasing. My main tasks include creating prototypes,

conducting research, gathering and analyzing functionality, collaborating with stakeholders, and ensuring that the interfaces are not only visually appealing but also functional and easy to use. To succeed in this role, I have become proficient in using Figma and other design tools like Framer and Illustrator, as well as having a basic knowledge of HTML, CSS, and JavaScript.

Education

University of Transport and Communications, Campus in Ho Chi Minh City
