Nguyễn Đỗ

Senior Software Developer at TMA Solutions
Ho Chi Minh City, Vietnam

Summary

My name is Nguyen. I have five years of experience working as a software developer. My main programming language is Java, and I use frameworks like Spring Boot. Additionally, I can use Linux bash scripting, Azure CI/CD, Docker, and have experience working with both monolithic services and Microservices. I am familiar with Gradle, Maven, and NPM for build and package management. I have also worked with databases such as SQL Server and PostgreSQL.

I use tools like JIRA for working status management and GIT/SVN for version control, Confluence for working collaboration. Furthermore, I am familiar with the Agile/Scrum process and have experience working with foreign customer engagement and team collaboration.
