Nguyen Tai

Software Engineer at Accenture - Leading AI Innovations
Ho Chi Minh City, Vietnam

Summary

With deep knowledge and experience specializing in AI industry and full stack web development, mobile development, and comprehensive software development life cycle, I am constantly seeking new challenges and opportunities to learn and grow and also eager to apply my skills, experiences and knowledge to help build innovative solutions that make a real difference in people's lives. Let's connect and discuss how we can collaborate to make a positive impact in our communities.

Experience

Accenture

Software Engineer

September 2024 - Present (7 months)

Ho Chi Minh City, Vietnam

- As a dynamic Software Engineer at Accenture, I am at the forefront of technological innovation within the GEN Wizard platform.
- My role is a thrilling blend of reverse engineering and cutting-edge AI, where I harness the power of Multi-Agent Frameworks like AutoGen and Langchain by leveraging the capabilities of Large Language Models (LLMs) and Generative AI (GenAI) to orchestrate complex tasks with precision and creativity.

JourneyHorizon

Software Engineer

March 2022 - September 2024 (2 years 7 months)

Ho Chi Minh City, Vietnam

- Build and develop multiple marketplace projects using ShareTribe (a comprehensive marketplace tool) on both web and mobile platforms.
- Tech stack used: ReactJS, TypeScript, AWS, Stripe, Firebase, NodeJs, Express, Bun, Vite, Figma, React Native, Flutter, Docker, ShareTribe SDK, Third-party library, ...
- Conduct a clean, reusable, and concise codebase.
- Collected user requirements and provided advisory services to clients.

- Participated in brainstorming sessions and offered solutions to various software challenges using modern technologies.
- Maintain and develop project functionality (alongside design and implement UI/UX)

Meete.co

Frontend Web Developer

July 2021 - April 2022 (10 months)

Ho Chi Minh City, Vietnam

- Build and develop multiple projects for solving promotion and merchant problems on web and mobile platforms.
 - Projects: chodeli.com, Meete (App store/ GGPlay)
 - Tech stack used: ReactJS, React Native, TypeScript, NodeJs, Express, Figma, Docker, NextJS, Tailwind, ...
 - Maintain and develop project functionality
- Design and implement UI/ UX

Education

VNUHCM - University of Science

Bachelor's degree, Information Technology · (2018 - 2022)
