## Experience

GHTK

AI Engineer

July 2023 - Present (1 year 9 months)

Hanoi, Hanoi, Vietnam

Computer Vision engineer

AN Lab JSC

AI Engineer

January 2022 - June 2023 (1 year 6 months)

Ha Noi

Project Description:

- Build an internal system using OCR to extract information from Japanese License Plate and Japanese ZipCode Address.
- Developed and implemented a system for retrieving images of pharmaceutical products.
- Developed and implemented an anti-spoofing system base on a single RGB image and deployed it to an Android application.
- Developed and implemented a system for tracking objects during the transportation and checking object- ing that.
- Tuning models to applications: Segmenting clothes, detecting pills, segmenting tags in electric product, segmenting water heaters, segmenting floor in room,...
- Worked with ONNX, TensorRT for converting, optimizing and serving models into the applications.
- Worked with TFLite, NCNN and Pytorch mobile for buidling some android application as Face Anti- Spoofing, Image Retrieval.

## Education

Hanoi University of Science and Technology

Engineer's degree, Control Engineering and Automation · (August 2018 - February 2023)
