# Thanh Nguyen

DevOps Engineer

Ho Chi Minh City, Vietnam

### Summary

As an experienced DevOps engineer, I specialize in deploying Infrastructure as Code, Cloud Operation, and CI/CD. My proficiency with Terraform, Ansible, Git, Azure DevOps, and AWS/Azure/vSphere cloud solutions enables me to efficiently manage and deploy infrastructure for cloud-based environments. I possess strong communication skills in English, which enables me to collaborate effectively with customers and colleagues to deliver the most valuable solutions for the company.

## Experience

NAB Innovation Centre Vietnam
DevOps Engineer
March 2024 - Present (1 year 1 month)
Ho Chi Minh City, Vietnam

- Provision and manage scalable, secure, and highly available infrastructure using AWS CloudFormation for services like EC2, Lambda, VPC, and S3, ensuring efficient resource utilization.
- Design and maintain a robust Jenkins templating engine to support approximately 50 jobs per environment across multiple environments, streamlining CI/CD processes.
- Implement and manag Jenkins agents running on diverse EC2 configurations, including Spot Instances, On-Demand Instances, and Dedicated Hosts, optimizing cost and performance.
- Ensure application security and adherence to code quality standards by integrating tools such as Snyk for vulnerability scanning and SonarQube for static code analysis.

EPAM Systems
DevOps Engineer
September 2023 - February 2024 (6 months)

- Provision and manage infrastructure on AWS with various services, such as IAM, EC2, Lambda, VPC, Load Balancer, CloudWatch, and Systems Manager.

- Develop Terraform and Terragrunt code for provisioning AWS infrastructure across multiple environments.
- Develop Ansible scripts to configure specific services on EC2 instances.
- Manage CI/CD pipelines using AWS CodeCommit, CodeBuild, and CodeDeploy.

Saigon Technology - Top Software Outsourcing Company in Vietnam

DevOps Engineer

June 2022 - June 2023 (1 year 1 month)

Ho Chi Minh City, Vietnam

- Managed and maintained multiple cloud resources on Azure for up to 15 tenants across 5+ environments.
- Utilized various Azure services, including Key Vault, Storage Accounts, Logic App, APIM, and Application Insights, for secure storage, workflow automation, API management, and application performance monitoring.
- Implemented CI/CD pipelines using Azure DevOps for efficient and seamless deployments.
- Worked on Monitoring and Alerts to identify and resolve system issues promptly.
- Developed automation scripts using Powershell/Python to streamline processes and increase efficiency.

Orient Software Development Corp. DevOps Engineer January 2022 - June 2022 (6 months) Vietnam

- Developed and maintained serverless mobile apps and web pages using AWS Amplify, leveraging API Gateway, Cognito, and Lambda functions.
- Implemented customer support web pages to enhance workflows and communication.
- Collaborated with developers to identify and resolve system issues, ensuring minimal downtime.

**FPT Software** 

1 year

DevOps Engineer July 2021 - December 2021 (6 months)

- Design, build, and develop multiple Jenkins pipelines for continuous integration (CI) and utilize ArgoCD for continuous delivery (CD) serving a microservices-based application.
- Configure and maintain Kubernetes clusters on both on-premise and cloud infrastructures.
- Ensure application performance and troubleshoot issues using the Elastic, Logstash, and Fluentd (ELF) stack.
- Review and develop related manifests such as Jenkinsfile, Dockerfile, and Kubernetes manifests.

## CloudOps Engineer

January 2021 - December 2021 (1 year)

- Managed and maintained AWS services, including but not limited IAM, S3, EC2, VPC, and RDS, for high availability and performance.
- Managed infrastructure provisioning in 5+ environments using Terraform, utilizing S3 for state management and leveraging terraform workspace for multi-environment control.
- Used Ansible for daily health checks, monthly patching, and configuration of VMs, ensuring compliance and security.
- Built and maintained automated pipelines for provisioning 50+ EC2 instances using Jenkins, Terraform, Packer, Vault, and Ansible.

#### LINKBYNET

System Administrator
July 2019 - July 2020 (1 year 1 month)

- Windows system administrating, specializing in Azure and vSphere resources for hybrid systems
- Building and managing automated patching processes for Windows servers using Powershell and Chef.
- Integrating Zabbix for comprehensive monitoring of large-scale hybrid systems.

## Education

University of Information Technology
Bachelor's degree, Information Technology · (2016 - 2021)
