Insights on Generative AI for Non-Tech Business Leaders
Ho Chi Minh City, Vietnam

Summary

Are you a business leader feeling overwhelmed by the rapid
advancements in AI, especially generative AI? You're not alone.
I help non-tech business professionals like you navigate the
complexities of this transformative technology, turning it from a
source of confusion into a powerful competitive advantage.

With a decade of experience in data science, I've seen firsthand
how technology can revolutionize industries. Now, I'm focused on
demystifying generative AI – from ChatGPT to image generation
and beyond – explaining its practical applications in clear, business-
focused language. I cut through the jargon and deliver actionable
insights you can use today.

My background in data warehousing, business intelligence, and
data science (using tools like Azure, Power BI, Python, and more)
provides a solid foundation for understanding the underlying
mechanics of AI. But more importantly, it allows me to translate
complex technical concepts into real-world business strategies.

I'm passionate about empowering business leaders to:
- Understand the potential of generative AI to transform their
operations, marketing, and customer experiences.
- Identify practical use cases for AI within their specific industries.
- Make informed decisions about AI adoption and implementation.

I regularly share insights and news on generative AI through my
newsletter and LinkedIn posts. Connect with me to stay ahead of the
curve and discover how AI can drive your business forward.
Let's explore the future of business together.
