Quoc Nguyen

SRE/DevOps Engineer | Senior-year student at University of
Information Technology (UIT)
Ho Chi Minh City, Vietnam

Summary

I'm a senior year student at University of Information Technology
(UIT) and major in Computer Networks and Data Communications.
I have a strong skill set in both front-end and back-end web
development, along with experiences with DevOps and network
engineering.

Experience

FPT Software
DevOps Engineer
March 2025 - Present (1 month)
Ho Chi Minh City, Vietnam

THD Cyber Security
6 months

DevOps Engineer
October 2024 - January 2025 (4 months)
Ho Chi Minh City, Vietnam

• Performed researches on DevOps monitoring technologies including Datadog
and Splunk.
• Built and maintained observability pipeline with Vector to transform and
enrich logs, increasing flexibility and monitoring efficiency.
• Designed and maintained CI/CD pipelines using GitLab CI, significantly
improving code quality and reducing deployment time.
• Implemented monitoring dashboards and alerting systems with Datadog,
enhancing system reliability and reducing incident response time by 40%.
• Built Datadog integration to collect custom metrics from VMware ESXi hosts
on schedule, resulting in cost savings of $1,000 per month for the client.
• Developed and maintained synthetic testing solutions using Cypress and
Grafana K6 to automate API testing and increase testing efficiency.

DevOps Intern
August 2024 - October 2024 (3 months)

Ho Chi Minh City, Vietnam
