Nguyen Duy Phuong

Software Engineer
Ho Chi Minh City, Vietnam

Summary

Hi there! I am a professional software developer with a passion for creating efficient and innovative solutions. I graduated from UIT University with a degree in Information System and have since gained over 2 years of experience in programming java web and java services using the Spring Framework.

Throughout my career, I have honed my skills in working with microservices and message brokers such as RabbitMQ. I have also gained extensive experience in fintech, specifically e-wallet development, and have worked on frontend development using Angular.

One of the most rewarding aspects of my career has been working directly with clients in the US, where I have had the opportunity to develop strong communication and collaboration skills. I am always seeking new challenges and opportunities to learn and grow as a developer, and I am excited to see what the future holds in this ever-evolving industry.

Experience

CMC Global Company Limited.
Software Engineer
May 2022 - Present (2 years 11 months)
Vietnam
