Summary

My hands-on experience:
+I used to work with Terraform as a Infrastructure as Code technologies. By using Terraform I can create, deploy the infra on Azure (VM, ACR, AKS, Application Gateway).
+And for Configuration management aspects, I also used to work with Ansible to install application, tools for the infrastructure.
+About Deployment aspects, I have experienced in application deployment with Docker, Kubernetes.
+Go to the CI/CD pipeline, I can utilize Jenkins pipeline to automate some tasks just like pull resource from server, build image, deploy application to servers.
My English Skill is good enough for researching English documents, communicating with foreign clients
