Vietnam

Summary

Based on 12 years working in networking and programming, I have experience in system administration, automation, optimization of deployments in AWS, Azure, GCP and DevOps CI/CD processes.

—————

Experience

Forix
Senior Devops Engineer
January 2020 - Present (5 years 3 months)
Ho Chi Minh City, Vietnam

Sutrix Group
10 years

DevOps Engineer
2017 - 2019 (2 years)
Ho Chi Minh City, Viet Nam

My responsibility includes, but not limited to:
• Proposing DevOps ecosystems (CI/CD) for enhancing manual building/ testing/deployment tasks in modern SDLC.
• Audit infrastructure's security & make necessary changes, include backups, patches, and scaling.
• Install, configure and manage DevOps tools as Docker, ELK Stack, Gitlab, Sonar, Jenkins, Selenium.
• Manage VM/Cloud infrastructure, including but not limited to building, deploying, orchestrating clusters (in AWS, GCP, Azure, Alibaba)
• Optimize infrastructure for security, performance, and cost.

Senior System Engineer
2013 - 2017 (4 years)
Ho Chi Minh City, Viet Nam

• Install, configure, and manage servers Linux, Windows.
• Buid and maintain automated CI/CD pipelines for code deployment using Jenkins, Gitlab CI.
• Create and configure appropriate environment on servers for new projects.

• Audit infrastructure's security & make necessary changes, include backups, patches, and scaling.

• Research and make recommendations on server system administration. Keep an eye out for needed updates.

• Build monitoring, alerting systems and analyze logs.

• Support developer debug and deploy projects.

Network Administrator
2009 - 2013 (4 years)
Ho Chi Minh city, Viet Nam

- Manages, installs and deploys networking infrastructure

- Troubleshoots and resolves network issues

- Coordinates maintenance contracts for network related equipment to maintain

hardware and software coverage as requested/directed by IT management

- Maintains network security

Free lance
PHP Web Programmer
2007 - 2009 (2 years)
Ho Chi Minh city, Viet Nam

- Experience working with PHP and MySQL

- HTML/CSS/JavaScript experience

RESPONSIBILITIES:

- Assist in maintaining existing web applications and websites

- Work as a team and independently to develop new features based on prototypes/mockups

- Responsible for debugging, testing, and resolving issues reported in a timely manner
