Tam Nguyen

UI/UX Designer | Intuitive Digital Experience

Ho Chi Minh City, Vietnam

Summary

Hey there, I'm Tam, a UI/UX designer on a mission to express my creativity and expand my knowledge.

Currently, I'm wearing the hat of a UI/UX designer at Saigon Technology Solution. We serve a diverse clientele, from government to non-government, both locally and internationally (SEA, Europe, US). My gig here involves whipping up user-friendly interfaces for digital goodies like websites and apps, all while following those UX golden rules.

With a couple of years under my belt, I'm hungry to keep growing and dishing out awesome designs.
